Product features:

Product short description:

Cat Eyes reflective helmet band is a simple, practical identification aid for military and tactical personnel. It helps operators identify unit members in low-light conditions, suitable for night operations, tactical training and other situations requiring quick visual recognition.

- **Material:** Reflective fabric band designed to improve visibility in poor lighting.
- **Use:** Intended for military, law enforcement and tactical teams during night ops and low-light training.
- **Fit:** Designed to fit standard military helmets; attaches and removes without major modification.
- **Color:** Green reflective band providing clear visual identification of team members.
