Product short description:

The Gold Ribbon Star with Five-Point Fronds is a military ribbon device for 37 mm service ribbons. Made from high-quality gold-toned metal with finely worked fronds, it represents courage, merit and exceptional conduct under severe personal risk.

- **Material:** High-quality gold-toned metal with finely worked fronds.
- **Size:** Measures 8x8 mm; designed to fit 37 mm ribbons.
- **Use:** For application to service ribbons on Army, Air Force and Navy uniforms to denote distinction.
- **Ideal for:** Collectors, military units and serving personnel seeking accurate, detailed ribbon devices.

Product description:

Product overview

The Gold 5-Point Star with Laurel Fronds for ribbons is a small decorative emblem designed for 37 mm military ribbons and dress mounts. It is intended for service members updating uniforms, unit supply, collectors restoring period kits, and police or tactical displays.

Definition: a gold-colour metal 8x8 mm star with decorative side fronds that signals high merit or ceremonial prestige on a ribbon. The piece reflects Italian military tradition and is a recognizable element on Valore Militare ribbon mounts.

Main features

Compact, durable and made to match the official format for 37 mm ribbons.

- **Size:** 8 mm × 8 mm — standard for 37 mm ribbons.
- **Material:** high-quality gold-colour metal with anti-oxidation treatment.
- **Finish:** bright, wear-resistant surface with clean edging.
- **Design:** symmetrical five-point star with finely detailed laurel fronds.
- **Attachment:** stable rear fastening, compatible with standard NATO-style ribbons.
- **Use cases:** suitable for uniforms (ceremonial and operational), collectors, unit issue and displays for military, police and tactical contexts.

How to use / When it's useful

Quick answer: mount the star on 37 mm ribbon bars to indicate a high-level merit or to complete a historically accurate ribbon set. Installation is designed to be straightforward and to avoid permanent damage to the ribbon when applied correctly.

In most cases, units and individuals use this star for dress uniforms, parade ribbons, restoration of historical uniforms, or for official supply needs. It is also commonly used by collectors to complete military surplus displays and duty or ceremonial gear.

Care and notes

Simple care keeps the piece looking its best and prevents damage to ribbons during application.

- Wipe with a soft, dry cloth; avoid abrasive cleaners.
- Store in a dry place to preserve the anti-oxidation finish.
- Check the attachment before fitting to avoid bending or stressing the ribbon fabric.
- Handle with care during installation on ceremonial or historical uniforms.

FAQ

Q: Is this the official size for ribbon stars?

A: Yes. The item measures 8x8 mm, the standard format for application on 37 mm ribbons.

Q: Can it be used on modern service and ceremonial uniforms?

A: Yes. It suits both modern and historical uniforms for ceremonial, operational or representative use.

Q: Is the attachment system safe for ribbons?

A: The star uses a stable rear fastening designed for standard ribbon bars; when applied correctly it should not damage the ribbon.

Q: Is this suitable for collectors?

A: Absolutely. Collectors commonly use this star to complete ribbon sets and restore period uniforms.

Q: Are there other finishes available?

A: Variants in silver and bronze finishes are commonly used for different merit levels; check available options when selecting.

Q: Can I buy multiple pieces for unit supply?

A: Yes. Multiple units are suitable for supplying whole ribbon sets or outfitting a platoon's ceremonial dress.

Tip: Choose the correct finish and the 8x8 mm size for 37 mm ribbons, and consider matching related items (ribbon bars, additional stars in silver or bronze, and rigid ribbon mounts) to complete your uniform or collection.
