- **Fit:** Lightweight (33 g) with removable, tiltable temples for a secure fit.
- **Accessories:** Removable prescription-lens insert, two spare nose pads (two sizes) and complete case (rigid neoprene sheath + pouch).

**Product description:**

## Product overview

Kombat Tactical Glasses with a green rubberized nylon frame are designed for users who need

reliable eye protection, stable fit and lightweight comfort in tactical, military surplus, duty or police use. They suit field operators, outdoor workers and anyone needing protective eyewear that stays in place during movement.

Definition: these are smoked, anti-fog tactical glasses with a removable prescription insert and adjustable temples for a secure, adaptable fit.

**Main features**

Clear, practical features that balance protection and comfort for everyday tactical and outdoor tasks.

- **Frame:** green rubberized nylon for grip and durability
- **Lenses:** smoked, anti-fog lenses, 2.3 mm thick
- **Fit:** removable and tiltable temples for a custom angle
- **Prescription support:** removable insert for corrective lenses
- **Weight:** very light at 33 g
- **Included:** hard neoprene case, cloth pouch, plus 2 replacement nose pads in two sizes

**How to use / When it’s useful**

Quick answer: use these glasses whenever you need protection from wind, dust, debris or glare while keeping a lightweight, secure fit. They are suitable for tactical training, patrols, outdoor work and general duty tasks.

In most cases, the smoked lenses reduce glare and the anti-fog treatment helps maintain visibility during temperature changes or intense activity. Adjust the temples and swap nose pads to match your face shape, and fit the removable prescription insert if you wear corrective lenses.

**Care and notes**

Simple care keeps the glasses performing well and preserves the anti-fog finish and frame grip.

- Store in the neoprene case or cloth pouch to avoid scratches.
- Clean lenses with a soft cloth and lens cleaner to prevent streaks and micro-scratches.
- Use the spare nose pads to maintain comfort; choose the size that fits your nose bridge.
- Do not assume protective certifications beyond those stated; use as eye protection against wind, dust and glare.

## FAQ

**Q:** Are the lenses dark or clear?

**A:** The lenses are smoked to reduce glare and improve comfort in bright or variable light

conditions.

**Q:** Do the lenses fog up easily?

**A:** They have an anti-fog treatment designed to reduce condensation during extended use or temperature changes, though care and cleaning help maintain performance.

**Q:** Can I use these with my prescription lenses?

**A:** Yes. A removable insert for corrective lenses is included so you can fit your prescription lenses inside the frame.

**Q:** Are the glasses heavy after long wear?

**A:** No. At 33 g they are very lightweight, which reduces pressure on the nose and ears and lowers fatigue during long sessions.

**Q:** Can I adjust the fit to my face?

**A:** Yes. The temples are removable and tiltable, and two sizes of replacement nose pads are supplied to tune the fit.

**Q:** What accessories are included?

**A:** The package includes a hard neoprene case, a cloth pouch and two spare nose pads in two sizes for comfort and protection during transport.

**Tip:** Choose the variant that best matches your face shape and intended use, and check related tactical eyewear and protective accessories to complete your kit. Browsing similar items for different lens options or additional protective gear can help you find the right setup without guessing.
