Product short description:

The Gallone Lastra Oro 15 mm is a gold braid trim for uniforms, insignia and professional edging. Suited to tailors, restorers and collectors needing precise, consistent decorative borders.

- **Material:** Gold-coloured braid with a 4 mm raised central lustrone for depth and subtle shine.
- **Height:** 15 mm width, for standard uniform applications.
- **Sold:** By the metre for custom cutting, repairs and tailored work.
- **Use:** For regulatory, ceremonial and collector items where a neat, colour-consistent finish is required.

Product description:

Product overview

The Gallone Lastra Oro 15 mm is a 15 mm woven gold trim designed for uniforms, ceremonial garments and restoration work where a neat, durable golden finish is needed. It is aimed at tailors, uniform suppliers, restorers, collectors and anyone working with military, ceremonial or

police attire.

Definition: a gallone oro is a woven decorative tape with a gold-look finish; this model features a 4 mm raised central glossy band that gives a clean “plate” effect and consistent light reflection.

Main features

Built for clear visual definition and precise application, the Gallone Lastra Oro 15 mm balances subtlety and visibility for professional finishing on garments and accessories.

- **Width:** 15 mm — suitable for precise borders and profile definition.
- **Raised central band:** 4 mm glossy relief for a uniform reflective “lastra” effect.
- **Woven construction:** traditional passamaneria for stable sewing and neat edges.
- **Sold by the metre:** buy the exact length you need to avoid waste and ensure colour consistency.
- **Typical uses:** uniform trim, ceremonial detailing, tailoring repairs and display work.

How to use / When it's useful

Quick answer: use this gallone for finishing edges, defining profiles or replacing worn trim on uniforms and ceremonial garments. It works well where a clear golden highlight is required without bulk.

In most cases, order the full amount needed for the complete garment or batch to keep tone and weave consistent. This trim is also useful for restorations, small tailoring jobs and display or collector pieces where visual accuracy matters.

Care and notes

Simple handling and practical ordering make this gallone suitable for professional and hobby use; follow these practical notes for best results.

- Measure the area to be trimmed and add a margin for seams, overlaps and test stitches.
- Order extra metres for future repairs to ensure colour and weave match over time.
- Sew with suitable needles and stabilise seams to maintain the raised band appearance.
- Store away from direct sunlight and moisture to preserve the gold look and fabric stability.

FAQ

Q: Is the gallone sold by rolls or by the metre?

A: It is sold by the metre so you can buy the exact quantity needed for your project and avoid excess waste.

Q: What is the width of this gallone?

A: The width is 15 mm, a versatile size that works for precise borders while remaining visible on uniforms and ceremonial pieces.

Q: What does “raised central glossy band” mean?

A: It refers to a 4 mm raised glossy strip in the centre of the tape that improves light reflection and gives a cleaner, more defined finish.

Q: Can I use this gallone for repairs on existing uniforms?

A: Yes. Selling by the metre makes it practical for replacements and restorations; measure carefully to match original sections.

Q: Will the gold colour be consistent along the whole length?

A: The product is selected for consistent colour and weave; for large runs, order the total needed at once to minimise any batch variation.

Q: Is this suitable for ceremonial and collector items?

A: Yes. The glossy raised band and neat weave make it well suited to ceremonial use, displays and collector restorations.

Tip: Choose the correct width and order a small extra length for tests and overlaps. Browse matching sizes (for example 12 mm or 20 mm) and related trims to complete your project and ensure uniform appearance across repairs and new garments.
