Product short description:

The Telino Copri Elmetto Mission GEN. II SBB Vegetato is a technical helmet cover for AS501 and TK3S helmets, designed for professional operators who need a durable, configurable cover. Fits sizes S/M/L/XL for secure operational use.

- **Material:** 1000D nylon / 100% polyester with anti-abrasion treatment for enhanced durability.
- **Fit:** Compatible with AS501 and TK3S helmets; perimeter adjustment ensures a snug fit in S/M/L/XL.
- **Features:** Integrated MOLLE, reinforced front panel, goggle support, rear pocket for counterweight, plus 7 fastening straps with extensions.
- **Weight & Care:** Lightweight (175 g) and washable for easy field maintenance.
- **Supply:** Built for professional use; available from Tutto Militare with support and availability guaranteed.

Product description:

Product overview

The Copri Elmetto Mission Gen. II SBB Vegetato is a tactical helmet cover designed for military, police and other duty operators who need improved camouflage, accessory integration and helmet surface protection. It fits regular-cut helmets such as AS501 and TK3S and is built for field use in mixed vegetation.

Definition: a helmet cover that provides camouflage, accessory mounting and protective fabric over an operational helmet. This product suits tactical, military surplus and police use where modularity and durability matter.

Main features

Durable, low-profile cover with modular attachment points and size options for common operational helmets.

- **Material:** 1000D Nylon Polyester 100% — abrasion- and tear-resistant, washable
- **Sizes:** S/M (AS501 S/M), L (AS501 L, TK3S Small/Medium), XL (AS501 XL, TK3S Large)
- **Attachment:** 7 double hook-and-loop straps plus supplied 7 black adhesive extensions for helmets without internal Velcro
- **MOLLE:** double-band MOLLE for small pouches, tactical lights, IR markers or micro-cameras
- **Front:** reinforced double ripstop panel with foldable Velcro pad for lights/cameras
- **Rear:** concealed pocket for counterweights, IR kits, batteries or ID/medical items
- **Weight:** 175 grams; perimeter elastic for a snug fit without shifting

How to use / When it’s useful

Use the cover to add vegetation-pattern concealment and to mount small helmet accessories during patrols, training or operations in wooded and mixed-terrain areas. Fasten the 7 straps and adjust the perimeter elastic for a secure fit on regular-cut helmets.

Quick answer: attach the cover, secure the straps and use the adhesive extensions if your helmet lacks internal Velcro. In most cases, this will keep the cover stable during running, climbing or close-quarters movement while allowing accessories such as NVG mounts, lights and comms to remain functional.

Care and notes

Designed for field durability and simple maintenance. Clean debris and dry before storage; check attachments regularly.

- Machine-washable or hand-wash on a gentle cycle—use mild detergent and cold water.
- Avoid high-heat drying to preserve fabric and Velcro performance.
- Check Velcro and straps after heavy use; replace adhesive extensions if worn.

- Warning: do not modify the helmet cover in ways that could interfere with the helmet’s certified protective performance.

FAQ

Q: Is this helmet cover only compatible with military helmets?

A: No. It is optimized for AS501 and TK3S military helmets but will fit other helmets with a regular cut and similar shell shape.

Q: Are the adhesive extensions included?

A: Yes. The cover ships with 7 black adhesive extensions to attach the cover to helmets that do not have internal Velcro.

Q: Can I wash the cover?

A: Yes. The 1000D nylon polyester is washable. Use a gentle cycle or hand wash with cold water and mild detergent, then air dry.

Q: Is the cover available in other camouflage patterns?

A: The current listing is for the vegetato pattern only. For other patterns or special requests, contact the supplier or sales channel for availability.

Q: Do you offer discounts for unit or institutional orders?

A: Yes. Discounts and centralized ordering options are commonly available for commands, police units and institutional purchases—ask sales for a quote.

Q: How long does delivery usually take?

A: Delivery times vary by supplier and location; typical processing is within 24–48 working hours after payment, followed by carrier transit time.

Tip: Choose the size that matches your helmet model (S/M, L, XL) and use the supplied adhesive extensions if your helmet lacks internal Velcro. Browse related tactical covers and helmet accessories to complete your loadout for police, military surplus or duty use.
