EAN13: 0658606550483
UPC: 658606550483

**Product features:**

**Product short description:**

Our Knee and Elbow Protection Set is made for adventurous riders and active users who want reliable coverage without restricting movement. Comfortable, lightweight and designed to withstand everyday impacts.

- **Material:** Constructed from high-quality materials for durability and comfort.
- **Use:** Suitable for skateboarding, cycling and rollerblading.
- **Protection:** Impact-resistant construction with padded zones to help absorb shocks from falls.
- **Fit:** Ergonomic shape with adjustable straps for a secure, customizable fit.
- **Age:** Designed to fit adults and teens.

**Product description:**

### Product overview

The Set Protections Knee and Elbow Pads is a protective gear set for people who need joint protection during physical training, airsoft (softair), tactical exercises or military-style drills.

Definition: a set of knee and elbow guards designed to reduce the impact of falls and knocks during active use.

Designed for practical, everyday use, the set combines a hard PVC outer shell with adjustable straps for a secure fit. Available in two color options (Black and Vegetated), it suits tactical, military surplus and police training needs.

**Main features**

Reliable construction and a simple fit make this set suitable for a range of activities where joint protection is needed.

- **High-resistance PVC shell:** hard outer cover for impact protection.
- **Double velcro adjustment:** two velcro straps secured with a steel ring for a stable fit.
- **Full coverage size:** 22 x 24 cm for knee and elbow protection.
- **Set includes:** both knee pads and elbow pads in a single kit.
- **Versatile use:** suitable for training, airsoft, tactical drills and military-style exercises.
- **Color options:** Black and Vegetated (selectable from the drop-down menu).

**How to use / When it’s useful**

Quick answer: strap the pads on so the hard shell covers the front of the joint and tighten the velcro straps until the pads sit snugly without cutting circulation. In most cases, the double velcro system will keep the pads in place during running, kneeling and controlled falls.

Use the set for gym training, outdoor tactical practice, airsoft matches or basic military-style drills where impact protection is needed. Check fit before any high-intensity session and re-tighten straps if the pads shift.

**Care and notes**

Keep the pads functional and comfortable with simple maintenance and regular checks of the straps and shell.

- Clean with a damp cloth and mild soap; air dry away from direct heat.
- Inspect velcro straps and steel rings regularly for wear and secure fastening.
- Ensure a correct fit to avoid slipping or restricted movement.
- Warning: not a certified substitute for industrial or medical-grade protective equipment in hazardous environments.

## FAQ

**Q:** What materials are used for the knee pads?

**A:** The outer shell is made of high-resistance PVC. Inner padding and straps are designed for comfort and secure attachment.

**Q:** How do I adjust the fit?

**A:** Fit is adjusted using two velcro straps that loop through a steel ring. Tighten until the pad sits snugly without blocking circulation.

**Q:** What are the dimensions of the pads?

**A:** The set dimensions are 22 x 24 cm, providing front coverage for standard adult knees and elbows.

**Q:** Which color options are available?

**A:** You can choose Black or Vegetated. Select the desired option from the product drop-down menu before adding to cart.

**Q:** For which activities is this set recommended?

**A:** Recommended for training sessions, airsoft (softair), tactical exercises and military-style drills where basic joint impact protection is required.

**Q:** Is this product sold as a pair or individual pieces?

**A:** The item is sold as a set that includes knee pads and elbow pads, ready for immediate use.

**Tip:** Choose the color variant that matches your kit and check fit before use; browse related tactical and military surplus items to complete your protective setup.
