Product short description:

Nickel-plated steel handcuffs with a wrist stop, designed for law enforcement, security personnel and tactical training. A straightforward restraint option for operational and instructional use.

- **Material:** Nickel-plated steel construction.
- **Use:** Intended to restrain wrists for police, security and training applications.
- **Fit:** Wrist stop feature helps control wrist position; designed for adult wrists.
- **Care:** Wipe clean, dry thoroughly and inspect regularly for wear before use.

Product description:

Product overview

The Manette Acciaio Nickel with wrist stop are nickel-plated steel handcuffs designed for police, security professionals and anyone needing a reliable restraint device. They come as a pair weighing 370 g and feature a double-locking system for safer handling.

Definition: These are nickel-plated steel restraint handcuffs with a wrist-stop mechanism and double key locking, intended for duty, tactical and security use.

Main features

Built for durability and everyday professional use, these handcuffs balance strength and comfort for transport and custody situations.

- **High-quality material:** nickel-plated steel for strength and corrosion resistance.
- **Ideal weight:** 370 g per pair, sturdy without being excessively heavy.
- **Double-locking keys:** supplied with a double-lock system to prevent further tightening.
- **Wrist stop:** keys have a pin on the tip that enables secure wrist-stop locking.
- **Suitable for duty use:** designed for police, Carabinieri, Guardia di Finanza and private security professionals.

How to use / When it’s useful

Quick answer: Use these handcuffs to restrain and transport detainees securely while reducing the chance of over-tightening. Engage the double-lock after applying the cuffs to stabilize the fit.

In most cases, officers and security staff use them during arrests, transfers and controlled detentions where a durable, tactical restraint is needed. They are practical for both police and private security/duty applications.

Care and notes

Regular care extends service life and maintains smooth operation; follow these simple maintenance steps and safety notes.

- Keep cuffs clean and dry; wipe off salt or moisture after exposure to wet conditions.
- Lightly lubricate the moving parts occasionally with a suitable lubricant to prevent sticking.
- Always engage the double-lock to avoid accidental tightening and reduce wrist injury risk.
- Store keys in a secure place and carry a spare key when issued for duty.

FAQ

Q: Are these handcuffs suitable for professional use?

A: Yes. They are designed for law enforcement and security professionals and include a double-lock feature for duty use.

Q: Are the cuffs resistant to corrosion?

A: The nickel-plated steel construction improves resistance to corrosion compared with untreated

steel, helping them hold up in typical field conditions.

Q: Do the handcuffs come with keys?

A: Yes. Each pair is supplied with double-locking keys that include a pin on the tip to operate the wrist-stop mechanism.

Q: How heavy are the handcuffs?

A: The pair weighs 370 g, a balance between robustness and manageable weight for extended duty use.

Q: Are these handcuffs comfortable for the restrained person?

A: The design aims to reduce constriction; using the double-lock properly helps limit movement and reduce pressure on the wrists.

Q: How do I order these handcuffs?

A: Register on the seller’s site, complete any required document verification if necessary, then confirm your order and choose a shipping method. Follow the seller’s checkout steps for final purchase.

Tip: Choose the correct finish and check available variants before adding to cart; consider browsing related duty and tactical gear to complete your loadout.
