Product features:

Product short description:

Holex ear protection plugs provide comfortable hearing protection for people who need quiet in noisy environments. Ideal for concertgoers, travelers and anyone who wants to sleep or concentrate without disturbance.

- **Material:** Made from soft, hypoallergenic material for extended use without irritation.
- **Use:** Suitable for concerts, travel and sleeping; reduces unwanted noise while maintaining sound quality.
- **Fit:** Shaped to fit the ear for a secure, comfortable seal.
- **Comfort:** Lightweight and discreet, designed for prolonged wear.
- **Protection:** Offers an effective barrier against disturbing sounds while allowing clear listening when needed.

Product description:

Product overview

The Tappi Protezione Udito Suono Orecchie Holex are reusable gel earplugs designed for people

who need reliable hearing protection with all-day comfort—from concertgoers and frequent flyers to workers in noisy environments and duty personnel. These earplugs combine a soft three-flange gel design with practical accessories for easier carry and use.

Definition: Reusable, washable gel earplugs with a three-flange shape providing hearing protection rated SNR 29 dB (H = 30 dB, M = 26 dB, L = 25 dB).

Main features

Built for comfort, durability, and easy storage, these earplugs work well for tactical, duty, and everyday hearing protection needs.

- **Soft gel construction:** Comfortable material that adapts to the ear canal for prolonged wear.
- **Three-flange design:** Ensures a secure fit and helps block unwanted noise.
- **Protection rating:** SNR 29 dB (H = 30 dB, M = 26 dB, L = 25 dB) for effective noise reduction.
- **Reusable and washable:** Easy to clean with mild soap and water for repeated use.
- **Belt-clip case and nylon cord:** Includes a clip-on carrying case and cord to prevent loss and simplify storage.

How to use / When it’s useful

Quick answer: Use these earplugs whenever you need to reduce loud noise while keeping comfort—at concerts, on flights, during noisy work tasks, or for sleeping. Insert gently into the ear canal and adjust the three flanges for a secure seal.

In most cases, these are suitable for daily use and short- to medium-term exposure to loud environments. They are not marketed as swim plugs; avoid prolonged submersion in water and do not use them in situations requiring certified water sealing.

Care and notes

Proper cleaning and inspection will extend service life and maintain performance. Follow simple care steps and replace the plugs if they show wear.

- Wash with warm water and mild soap; dry completely before storing in the belt-clip case.
- Inspect before each use; discard if torn, stiffened, or damaged.
- Not designed for swimming or extended water immersion.
- With proper care they can last several months, depending on use frequency.

FAQ

Q: How do I clean the Holex earplugs?

A: Wash them gently with warm water and a mild, neutral soap. Rinse well and dry completely before returning them to the belt-clip case.

Q: How long do the earplugs last?

A: With regular cleaning and proper storage they can last several months. Replace them sooner if the gel becomes sticky, torn, or loses shape.

Q: Are these earplugs suitable for sleeping?

A: Yes. The soft gel and ergonomic three-flange design make them comfortable for night use for most sleepers.

Q: Can I use them in water or for swimming?

A: No. While water-resistant to some extent, they are not designed for swimming or prolonged submersion and may not provide a watertight seal.

Q: What size are the earplugs?

A: They are one-size-fits-most, using a flexible three-flange design to fit a wide range of ear canals comfortably.

Q: How effective are they at reducing noise?

A: The earplugs have an SNR of 29 dB (H = 30 dB, M = 26 dB, L = 25 dB), which provides significant reduction of loud sounds in many environments.

Tip: Choose the right fit by testing the seal and comfort before long use; browse related tactical and duty hearing protection products to compare options and accessories.
