Product features:

Product short description:

The Cat Eyes Military helmet elastic strap is a practical accessory for military, police and outdoor users who need better visibility and a secure fit on their helmet in low-light conditions.

- **Material:** Durable elastic with reflective "Cat Eyes" strips for improved visibility.
- **Use:** Attaches to helmets to enhance safety during night operations, training and patrols.
- **Fit:** Designed to fit most helmet shapes and sizes; easy to install.
- **Durability:** Made from sturdy materials for reliable field use and long-lasting performance.

Product description:

Product overview

The Elastico per Elmetto Occhi di Gatto Cat Eyes Military is an elastic helmet band designed for military, police and tactical users who need improved night recognition. It helps teammates identify each other and reduces the risk of friendly fire during low-light operations.

Definition: a stretchable band fitted with night-reflective "cat eye" rectangles that attaches to most

helmets. Suitable for tactical, military surplus and police duty use where enhanced visibility is required.

Main features

Key features at a glance:

- **Night visibility:** Reflective rectangles improve detection in low light.
- **Compact reflective size:** Reflective panels measure 25 mm x 15 mm.
- **Easy to apply:** Simple to fit and remove for rapid use.
- **Secure elastic fit:** Stretch band stays in place without restricting movement.
- **Durable construction:** Made from materials designed to withstand regular field use.
- **Universal compatibility:** Fits the majority of standard helmets.

How to use / When it’s useful

Quick answer: fit the elastic band to your helmet so the reflective rectangles face outward; it is designed for quick fitting and removal. Use it during patrols, night exercises, convoy operations, training, or any situation where team recognition is needed.

In most cases, operators use this band alongside other identification methods and protocols. It is a practical visibility aid for tactical teams, military surplus setups, police units, and duty crews operating in low-light or mixed-light environments.

Care and notes

Basic care and important notes:

- Inspect the band before use and replace if reflective panels or elastic show significant wear.
- Clean with mild soap and water; avoid harsh solvents that could damage reflective material.
- Not a substitute for standard identification procedures—use as a supplementary visibility aid.

FAQ

Q: Is this elastic band compatible with all helmets?

A: It is designed to fit most standard military and tactical helmets. Compatibility depends on helmet shape and any mounted accessories.

Q: How long does the reflective effect last?

A: The reflective rectangles are made from quality materials intended for prolonged use. Lifespan depends on exposure to abrasion, chemicals and sunlight.

Q: Is it easy to put on and remove?

A: Yes. The band is intentionally simple to fit and remove so operators can apply it quickly during gear changes.

Q: What are the dimensions of the reflective panels?

A: Each reflective rectangle measures 25 mm x 15 mm, sized to balance visibility and low profile.

Q: Can I use this in bad weather?

A: Yes. The band is made from durable materials suitable for adverse weather, but inspect it after heavy exposure to water or mud.

Q: Is this meant to replace other identification methods?

A: No. This band is a supplementary visibility aid and should be used alongside established identification protocols and procedures.

Tip: Choose the correct fit for your helmet and check the band regularly for wear. Consider browsing related tactical and military surplus visibility products to create a complete identification setup.
