Product short description:

Pistol Cleaning Kit for caliber 9 mm — a compact maintenance set for shooters and gun owners. Designed for straightforward, effective cleaning, it helps keep your pistol in optimal condition and supports reliable operation over time.

- **Contents:** High-quality brushes, sturdy cleaning rods and absorbent cloths for thorough bore and surface cleaning.
- **Use:** Intended for routine maintenance of 9 mm pistols to reduce fouling and residue build-up.
- **Durability:** Components made to withstand regular use and provide long service life.
- **Portability:** Compact and easy to carry, suitable for range bags and workshop kits.

Product description:

Product overview

The 9 mm pistol cleaning kit is a compact maintenance set designed for owners of 9 mm handguns, including sport shooters, range users, duty/police officers, and tactical or military surplus enthusiasts. It gathers the basic tools needed for routine cleaning and lubrication in a

sturdy plastic case.

Definition: A portable 9 mm pistol cleaning kit with a cleaning rod, bronze brush, wool and bristle attachments, and an oil bottle for targeted lubrication.

Main features

All components are stored in a durable plastic case for easy transport and organized storage. The kit focuses on safe, effective barrel and parts cleaning for 9 mm pistols.

- **Cleaning rod** — for guided, controlled cleaning of the barrel.
- **Oil bottle** — designed for precise, targeted lubrication of moving parts.
- **Bronze brush** — removes stubborn fouling without scratching the bore.
- **Wool patch/brush** — absorbs solvent and polishes delicate surfaces inside the barrel.
- **Bristle (setola) brush** — good for lighter residue and general cleaning.

How to use / When it’s useful

Use the kit after shooting sessions, before storage, or during routine maintenance to keep a 9 mm pistol reliable and functioning. Start with a solvent pass using the bronze brush for heavy fouling, follow with wool patches, then apply light lubrication with the oil bottle to moving parts.

Quick answer: Use this kit for basic barrel and internal parts cleaning of 9 mm handguns. In most cases: a short cleaning after each range session and a more thorough service periodically will help maintain performance and longevity.

Care and notes

Store the kit dry and clean; replace worn brushes or cloths as needed. The tools are made for regular maintenance but require proper use to avoid damage.

- Only for 9 mm pistols — not intended for other calibers.
- Tools are designed to clean without damaging internal surfaces when used correctly.
- Oil bottle life varies with frequency of use; refill as needed.
- The kit is sold as a complete set; components are not available separately.

FAQ

Q: Is this kit only for 9 mm pistols?

A: Yes. The kit is specifically sized and configured for 9 mm handguns to ensure proper cleaning and fit of brushes and patches.

Q: Is the plastic case impact-resistant?

A: The kit comes in a sturdy plastic case designed to protect the tools during transport and storage, making it suitable for range bags and vehicles.

Q: Can the bronze brush damage my barrel?

A: No. The bronze brush is intended to remove stubborn fouling without scratching when used correctly; always follow recommended cleaning procedures and avoid excessive force.

Q: Are individual components available separately?

A: Currently the set is sold only as a complete kit to ensure you have all items needed for proper maintenance.

Q: How long does the oil bottle last?

A: That depends on how often you use it. The bottle is made for precise application and should last through many maintenance sessions under normal use.

Q: Is this suitable for duty or tactical use?

A: The kit provides basic field and at-home maintenance suitable for duty, police, tactical, and civilian use; for heavy-duty or armorer-level work, professional service may be required.

Tip: Choose the correct caliber variant and check related cleaning kits and accessories to complete your maintenance set. Browse matching tactical, duty, and police maintenance items to keep your equipment ready.
