- **Use:** Suitable for everyday wear and more formal occasions; adds a touch of sophistication

Product description:

Product overview

The Occhiali Aviator Pilot American Optical Eyewear are aviator-style sunglasses designed since 1958 to meet the strict specifications of the United States Air Force. They are built for pilots, military and police personnel, tactical users, and anyone seeking a durable, performance-focused pair of sunglasses.

Definition: These are military-spec aviator sunglasses with a tempered steel-alloy frame, bayonet

temples for helmet use, and anti-reflective lenses with strong UV protection.

Main features

Solid construction and practical features make these glasses suitable for duty use, tactical setups, and everyday wear.

- **Military-spec frame:** Tempered, polished steel-alloy frame for durability and impact resistance.
- **Bayonet temples:** Removable-style temples designed to be convenient with helmets and headgear.
- **Anti-reflective lenses:** High UV absorption to protect eyes in bright conditions (lenses are not polarized).
- **Available finishes:** Gold, satin silver, and black — all with 52 mm lens size.
- **Included accessories:** Each pair ships with a protective case for storage and transport.
- **Proven design:** Produced to meet the performance needs associated with military, police, and tactical use since 1958.

How to use / When it’s useful

Quick answer: Use these aviator glasses for flying, duty, tactical training, motorcycle riding, or everyday sun protection when you need a robust, helmet-compatible design. The bayonet temples make them easy to wear with helmets and other headgear.

In most cases, they work well for both professional and civilian use — ideal for military surplus collectors, police duty, tactical users, and anyone who prefers a durable aviator style. For very specific optical needs (prescription lenses or polarized lenses), check compatibility before purchase.

Care and notes

Basic care keeps the frame and lenses performing well for years.

- Clean lenses with a soft microfiber cloth and mild lens cleaner; avoid abrasive materials.
- Store glasses in the supplied protective case when not in use to prevent scratches and damage.
- Note: lenses are anti-reflective with high UV absorption but are not polarized.
- Bayonet temples are designed for helmet use and can be adjusted or removed according to fit and comfort.

FAQ

Q: What is the lens size?

A: The lens size is 52 mm for all available finishes, suitable for many face shapes and classic aviator proportions.

Q: Are the lenses polarized?

A: No. The lenses are anti-reflective and provide high UV absorption, but they are not polarized.

Q: Can I use these glasses with a helmet?

A: Yes. The bayonet-style temples are designed to be easily used with helmets and other headgear for pilot or tactical applications.

Q: Are these suitable for everyday wear?

A: Yes. They are built for both professional duty and daily use, offering comfort, eye protection, and a durable frame.

Q: What accessories are included?

A: Each pair comes with a protective case to keep the glasses safe during storage and transport.

Q: Which finishes are available?

A: The model is offered in three finishes: gold, satin silver, and black — all with 52 mm lenses.

Tip: Choose the finish that matches your gear and duty needs, confirm the 52 mm lens suits your fit, and browse related tactical and military surplus eyewear for matching accessories and protective cases.
