Product overview

This is a compact cleaning kit designed for AR-15, M16 and M4 rifles chambered in 223/5.56, ideal for shooters, armorers and tactical professionals. It is suited to hobbyists at the range, military surplus collectors and police or duty users who need a reliable field and bench cleaning set.

Definition: a complete 223/5.56 rifle cleaning kit including brushes, jags/scovils, patches and

adaptable rods for regular maintenance and safe operation.

Main features

Everything needed for routine bore and action maintenance, packed in a durable carry pouch.

- **Brushes:** Multiple sizes for deep cleaning of the bore and moving parts to remove fouling and deposits.
- **Scovils/Jags:** Tools designed to reach tight areas for a more complete clean in hard-to-reach spots.
- **Patches:** High-absorbency cleaning patches for wiping, oiling and final surface care.
- **Adaptable rods:** Rods that accept common scovils and jags for flexible use with available attachments.
- **Nylon pouch:** Green nylon storage pouch with dual closure (Velcro + snap) for protection and transport.
- **Compatibility:** Suited for AR-15, M16, M4 and other rifles in 223/5.56 caliber.

How to use / When it’s useful

Use the kit to clean the bore after shooting sessions, to remove carbon build-up from the bolt carrier group, and for routine lubrication of moving parts. Assemble the rods, attach the correct brush or jag, and work from the chamber toward the muzzle for safe, effective cleaning.

Quick answer: use it after range sessions, before storage, or whenever you notice performance issues. In most cases, a basic cleaning and light lubrication every few shooting sessions keeps these rifles running reliably.

Care and notes

Maintain the kit and store it properly to prolong life of the tools and keep cleaning effective.

- Replace patches when soiled; brushes and scovils are reusable but inspect for wear.
- The nylon pouch is moisture-resistant but not fully waterproof—keep kit dry for long-term storage.
- Avoid corrosive solvents; follow your firearm manufacturer’s cleaning and lubrication recommendations.
- Store rods and small parts together to prevent loss during transport to the range or field.

FAQ

Q: Is this kit compatible with calibers other than 223/5.56?

A: The kit is designed for 223/5.56 rifles, but some brushes and patches may work with other calibers. Check component sizes before use.

Q: Is the nylon pouch waterproof?

A: The pouch offers good protection against moisture and dirt but is not completely waterproof. Avoid submersion and store in a dry place.

Q: Are the brushes and scovils reusable?

A: Yes, brushes and scovils are reusable. Clean them after use and inspect for damage; replace when bristles or threads wear out.

Q: Can I buy replacement patches separately?

A: Replacement patches are commonly available and can be purchased separately to maintain ongoing cleaning needs.

Q: Does the kit include usage instructions?

A: Yes, the kit includes basic instructions for safe assembly and standard cleaning procedures. Follow firearm-specific guidance for detailed steps.

Q: Is this suitable for tactical or police use?

A: The kit is suitable for routine maintenance by tactical, police or duty users who need a portable cleaning solution for 223/5.56 rifles.

Tip: Choose the right rod length and patch size for your barrel, and check related tactical and military surplus cleaning accessories to complete your maintenance kit.
