Product short description:

The Maglia Termica Area Base con Zip is a thermal base-layer shirt with a front zip, designed to provide warmth and breathability for outdoor activities and colder days.

- **Material:** Made from high-quality fabrics for a snug, comfortable fit while maintaining breathability.
- **Use:** Ideal as a base layer for outdoor activities, work, or everyday cold-weather wear.
- **Fit:** Close-fitting cut that allows full freedom of movement and layers easily under outer garments.
- **Features:** Practical front zip for adjustable ventilation and easy on/off, ensuring reliable comfort and protection.

Product description:

Product overview

The Maglia Termica Area Base con Zip is a thermal base-layer shirt with a mid chest zip, designed for outdoor enthusiasts, tactical operators, military and police personnel who need

reliable warmth and mobility. It is suitable as a base layer for hiking, trekking, duty use and other outdoor activities.

Definition: a lightweight, quick-drying 95% polyester / 5% spandex thermal shirt with ergonomic fit, thumbholes and an extended back for lumbar coverage.

Main features

Built for comfort, movement and thermal performance, this garment balances insulation and breathability for multi-season use.

- **Material:** 95% polyester, 5% spandex for stretch and shape retention.
- **Lightweight & breathable:** fast moisture transport keeps skin drier during activity.
- **Mid-zip chest:** adjustable ventilation for rapid temperature control.
- **Extended rear hem:** shaped lumbar coverage to retain warmth during bending.
- **Thumbholes:** keep sleeves in place and provide extra hand protection in cold.
- **Durable construction:** withstands frequent washing and field use.

How to use / When it’s useful

Quick answer: wear the Maglia Termica Area Base con Zip as a primary base layer under an insulating mid-layer or alone in milder conditions. It performs well for hiking, running, cycling, travel and tactical duty where freedom of movement and moisture control are important.

In most cases, pair it with insulating layers in very cold weather and with a shell in wet conditions. The mid-zip allows fast cooling during high exertion and the slim fit works well under rigid jackets and combat gear.

Care and notes

Simple care keeps the fabric performing and extends the garment’s life.

- Machine wash cold (max 30°C) on a gentle cycle.
- Do not use fabric softener; it reduces moisture-wicking performance.
- Tumble dry low or hang to dry for fastest recovery of shape and function.
- Avoid bleaching or ironing to preserve elasticity and fabric finish.

FAQ

Q: What sizes are available?

A: The shirt is available in sizes S through XXL to fit a range of body types. Check the size chart to choose the correct fit for layering and mobility.

Q: Can I wear it every day?

A: Yes. The design is suitable for daily wear in both casual and work contexts thanks to its low-profile look and comfort-oriented construction.

Q: How should I wash the Maglia Termica?

A: Wash in a machine at low temperature (max 30°C) without fabric softener. Use a gentle cycle and avoid bleach to maintain performance.

Q: Is it warm enough for extreme cold?

A: It functions as an effective base layer to retain body heat, but for extreme cold combine it with insulating mid-layers and an outer shell suitable for the conditions.

Q: Does it dry quickly after sweating or washing?

A: Yes. The polyester-rich fabric dries rapidly after use or laundering, reducing chill from retained moisture.

Q: Can I wear it under a hard shell or tactical vest?

A: Certainly. Its slim, elastic fit and mid-zip design make it ideal as a base layer under rigid jackets, body armor or duty vests.

Tip: Choose the size that allows comfortable layering—if you plan to wear multiple insulating layers, consider your usual base-layer fit. Browse related tactical and military surplus base layers to complete your kit.
