How to use / When it’s useful

Quick answer: use this holster when you need flexible carry positions—underarm concealment, on-belt carry, cross-draw access, or behind-the-back transport. Adjust the fit and retention before use to match your pistol and preferred carry style.

In most cases, users select this holster for duty, tactical practice, range sessions, or discreet concealed carry from the underarm position. Always fit the holster with an unloaded firearm first and train draws and re-holstering under safe conditions.
