Product features:

Product short description:

Super Power Green Gas 1000 is a refill propellant for airsoft replicas. Ideal for players, shops and hobbyists who use gas-blowback pistols and rifles and need a ready-to-use green gas solution.

- **Use:** Refill gas for gas-blowback airsoft guns and magazines; for recreational and training applications.
- **Compatibility:** Intended for replicas compatible with green gas—check your model's fill valve and manufacturer instructions before use.
- **Safety:** Flammable, pressurised container. Keep away from heat and open flames, do not puncture, and store upright out of reach of children.
- **Product:** Supplied as the Super Power Green Gas 1000 canister. Follow supplier guidance for filling, handling and disposal.

Product description:

Product overview

The Bombola Gas Softair SuperPower Green Gas 1000 is a 1000 ml canister of green gas designed for gas blowback airsoft pistols. It is intended for airsoft players and hobbyists who need a reliable gas source for training, tactical scenarios, or recreational play.

Definition: A 1000 ml propane-based green gas with built-in lubricants for use in gas airsoft pistols. The large capacity helps reduce the number of refills during extended sessions and suits tactical, military surplus, and police-style training use.

Main features

Compact list of the product's key features and practical benefits.

- **Composition:** Propane blended with quality lubricants to help protect internal parts.
- **Capacity:** 1000 ml canister for multiple refills per session.
- **Safety valve:** Built-in valve designed for controlled, safe refilling.
- **Consistent pressure:** Formulation aims to provide steady pressure shot-to-shot.
- **Universal compatibility:** Suitable for gas-powered airsoft pistols and many GBB magazines.
- **Maintenance benefit:** Lubricants help reduce internal wear and support longer service life of moving parts.

How to use / When it's useful

Use this green gas to refill gas airsoft pistols and gas magazines following your gun manufacturer's refill instructions. Align the canister valve with the pistol or magazine refill valve, press firmly and control the flow using the safety valve.

Quick answer: It refills gas airsoft pistols and magazines for longer play without frequent top-ups. In most cases, a 1000 ml canister supplies many refills depending on pistol model, magazine capacity, and firing style.

Care and notes

Follow basic handling and storage recommendations to keep the canister safe and the pistol protected.

- **Storage:** Keep the canister in a cool, dry place away from direct sunlight and heat sources.
- **Handling:** Use the safety valve and follow your airsoft pistol or magazine refill instructions

to avoid overfilling.
- **Compatibility note:** Intended only for gas airsoft pistols and gas magazines—do not use in unrelated equipment.
- **Safety warning:** Contents are pressurised and flammable; keep out of reach of children and handle responsibly.

FAQ

Q: Is this gas compatible with all gas airsoft pistols?

A: Yes, the SuperPower Green Gas 1000 is formulated for universal use with gas-powered airsoft pistols and most gas magazines. Always check your pistol or magazine manual for any specific restrictions.

Q: How many refills can I get from a 1000 ml canister?

A: The number of refills varies by pistol model, magazine size, and firing rate. In most cases, a 1000 ml canister provides multiple full magazine refills and many partial refills during a day of play.

Q: Is the gas safe for my airsoft pistol?

A: The blend includes lubricants to reduce internal wear, which helps maintain moving parts. Use as directed and follow regular maintenance for best results.

Q: Is it easy for beginners to use?

A: Yes. The canister features a safety valve to make refilling controlled and straightforward. Beginners should still read the pistol/magazine refill instructions before first use.

Q: Are there storage or transport restrictions I should know about?

A: Store the canister away from heat, open flames, and direct sunlight. Because the product is pressurised and flammable, follow local regulations for transport and storage.

Q: Will this gas void my pistol warranty or cause damage?

A: The gas is designed to lubricate and protect internal parts, not damage them. However, always follow your pistol manufacturer’s recommendations to avoid any warranty or compatibility issues.

Tip: Choose the right gas volume and check compatibility with your pistol or magazines before purchase; browse related tactical and airsoft maintenance items like spare magazines, seals, and

lubricants to complete your kit.
