Product short description:

A pack of airsoft BBs suitable for players, hobby shooters and clubs. These pellets are intended for practice, target shooting and recreational airsoft matches, providing a straightforward option for everyday use.

- **Contents:** Pack of airsoft pellets (BBs) for replica firearms.
- **Use:** Designed for training, target practice and recreational skirmishes.
- **Compatibility:** Compatible with most standard airsoft replica firearms; check your model's requirements before use.
- **Condition:** New retail pack ready for immediate use.

Product description:

Product overview

The Confezione Pallini Softair is a 1 kg pack of 6 mm softair (airsoft) BBs designed for recreational skirmishes and training users who need consistent performance. Definition: 6 mm softair BBs available in 1 kg packs in either 0.20 g or 0.25 g weights.

These BBs are made from PE/PP/BaSO4 and undergo a multi-polishing process to improve roundness and feeding. Choose the weight from the dropdown to match your marker, tactical or

police training needs.

Main features

Reliable, high-quality 6 mm BBs suitable for airsoft play, tactical training, and general use.

- **Material:** PE/PP/BaSO4 blend for consistent density.
- **Finish:** Multi-polishing process for improved roundness and smoother feeding.
- **Available weights:** 0.20 g and 0.25 g options to suit different markers and conditions.
- **Pack size:** 1 kg bulk pack for extended play and training sessions.
- **Versatile use:** Suitable for recreational airsoft, tactical drills, and police training scenarios.

How to use / When it’s useful

Quick answer: Use these 6 mm BBs in compatible airsoft markers that accept 0.20–0.25 g BBs. Select the weight that matches your gun’s performance and the playing conditions.

In most cases, 0.20 g is a common choice for indoor or close-range play and higher FPS setups, while 0.25 g can offer better stability at longer ranges or in windy conditions. Always chronograph and test a small batch to confirm feeding and accuracy before bulk use.

Care and notes

Store and handle BBs to preserve quality and ensure safe use.

- Keep the pack sealed and store in a cool, dry place away from direct sunlight.
- Do not mix different weights in the same magazine or loader to avoid feeding issues.
- Use only in compatible 6 mm airsoft markers; check your marker’s recommendations first.
- Keep out of reach of children and follow standard airsoft safety rules (eye protection, safe firing zones).

FAQ

Q: What materials are these BBs made from?

A: The BBs use a PE/PP/BaSO4 blend and are processed with multi-polishing to improve roundness and surface finish.

Q: Which weights are available?

A: You can choose either 0.20 g or 0.25 g BBs from the product dropdown, depending on your marker and playing conditions.

Q: How much does the pack weigh?

A: Each pack contains 1 kg of BBs, providing a large supply for extended skirmishes or training sessions.

Q: Are these BBs suitable for beginners?

A: Yes. They are easy to load and use, making them suitable for beginners as well as experienced players and trainers.

Q: Will these BBs work in all airsoft guns?

A: They are intended for standard 6 mm airsoft markers. Verify your gun’s recommended BB weight and test feeding before bulk use.

Q: How should I store the BBs?

A: Store sealed in a cool, dry place away from heat and sunlight. Avoid mixing weights and keep them out of reach of children.

Tip: Choose the 0.20 g or 0.25 g variant based on your marker and play style, and consider browsing related tactical and training supplies to complete your loadout.
