Product short description:

Open-top triple magazine pouch in Vegetato camouflage for M4/AR that holds six magazines. For outdoor users and professionals needing quick, reliable access to spare magazines in the field.

- **Capacity:** Holds six M4/AR magazines in three open-top compartments for fast reloads.
- **Material:** Robust construction for durable, dependable field use.
- **Pattern:** Vegetato camouflage blends with natural surroundings for low visibility.
- **Fit & Use:** Easy to wear and adjust; suited for tactical rigs, belts and modular setups.
- **Access:** Open design ensures rapid magazine retrieval while maintaining secure retention.

Product description:

Product overview

The **Triple Stacker Open-Top M4 Mag Pouch (MA44)** by **Condor USA** is a tactical, triple magazine pouch designed to hold up to six standard M4/AR15 magazines. It is made for military

personnel, police, security teams and airsoft or outdoor enthusiasts who need fast, reliable access to spare magazines.

Definition: a compact, M.O.L.L.E.-compatible open-top pouch that stores six M4/AR magazines with elastic retention and drainage. This pouch is suited for tactical, military surplus and duty use where quick reloads matter.

Main features

Designed for quick access and modular mounting, this pouch balances durability and low weight for field use.

- Holds up to six standard M4 / AR15 magazines in a triple-stack configuration.
- Open-top design with elastic retention bands for fast, secure magazine extraction.
- M.O.L.L.E. mounting system for easy attachment to vests, belts and packs.
- Drainage grommets at each pocket base to expel water and debris.
- Durable Polyester 1000D construction for abrasion and tear resistance.
- Lightweight: 300 grams.
- Manufacturer code: **MA44** — product name: **Triple Stacker Open-Top M4 Mag Pouch** by **Condor USA**.

How to use / When it’s useful

Quick answer: attach the pouch to any M.O.L.L.E. platform, load magazines top-first into each pocket, and use the open-top access to perform fast reloads. The elastic retention holds magazines during movement but allows rapid removal when needed.

In most cases: use this pouch on tactical vests, belts or backpacks during training, duty shifts, patrols or airsoft matches. The vegetated camo pattern helps conceal the pouch in woodland and natural environments while the drainage grommets help in wet conditions.

Care and notes

Basic care keeps the pouch functional and extends its service life; inspect elastics and stitching regularly and clean out debris after use.

- Hand wash with mild soap and air dry; avoid high-heat drying that can damage fabric or elastic.
- Not fully waterproof—Polyester 1000D is water-resistant; drainage holes will expel water but prolonged submersion is not recommended.
- Check elastic retention bands periodically for wear and replace if they lose tension.
- Compatible with similar-sized magazines; verify fit if using non-standard or aftermarket mags.

FAQ

Q: Is this pouch only compatible with M4/AR magazines?

A: It is designed for standard M4 and AR15 magazines but can fit other magazines of similar dimensions provided they work with the elastic pockets.

Q: Can I mount this pouch on non-M.O.L.L.E. platforms?

A: The pouch uses M.O.L.L.E. webbing for mounting. Adapters may be available separately to fit non-M.O.L.L.E. platforms, but the pouch itself is M.O.L.L.E.-standard.

Q: Is the pouch waterproof?

A: No. The Polyester 1000D is water-resistant, but the pouch is not fully waterproof. Drainage grommets help remove water after exposure to rain or moisture.

Q: How much does the pouch weigh?

A: The empty pouch weighs approximately 300 grams, making it light to carry even when loaded with magazines.

Q: Is the vegetated pattern effective in all environments?

A: The vegetated camo is optimized for woodland and natural settings. It may be less effective in urban or desert environments but still helps break up the operator silhouette.

Q: Can I use this for airsoft or paintball?

A: Yes. The pouch is suitable for airsoft, paintball and other recreational activities that need quick magazine access and a modular mounting system.

Tip: Choose the pouch variant that matches your magazine type and platform. Check the fit with your magazines before field use and browse matching M.O.L.L.E. pouches and accessories to create a complete loadout suited to tactical, police or training needs.
