Product short description:

The Giaccone Parka ECWS Nero Impermeabile is a waterproof parka built for cold, rainy days and for people who need a practical, hard-wearing outer layer. It pairs a modern, understated look with functional details so you stay dry and comfortable whether commuting, on duty, or outdoors.

- **Material:** High-quality waterproof fabric and robust construction to resist wind and rain.
- **Protection:** Designed to keep you dry and help retain warmth in cold, wet conditions.
- **Features:** Functional pockets and a sturdy closure for practical, secure wear.
- **Color:** Nero (Black).
- **Use:** Versatile winter parka suitable for everyday wear, outdoor activities and work.

Product description:

Product overview

The ECWS Black Waterproof Parka is a heavy-duty field parka designed for military, police, security professionals and outdoor enthusiasts who need reliable protection from wind, rain and

cold. It pairs a water-repellent polyamide shell with a breathable membrane and a removable fleece liner for adaptable thermal control.

Definition: a waterproof, breathable tactical parka with sealed seams, armpit vents and a removable olive micro?fleece liner for modular insulation. Ideal for tactical, duty and military surplus use.

Main features

Built for wet, windy and variable conditions, the parka combines weatherproof materials and practical field details.

- **Water-repellent polyamide shell** with Oeko?Tex certification for safer textile use.
- **Advanta® membrane** for a balance of waterproofing and breathability.
- **Sealed seams with hot tape** to prevent water ingress at stitch lines.
- **Central zip with storm flap** secured by seven press studs for added wind and rain protection.
- **Armpit zips** for targeted ventilation and temperature control during activity.
- **Removable olive micro?fleece liner** (100% polyester micro pile) for modular insulation or standalone use.
- **Field pockets and ID areas**: shoulder arm pocket with Velcro flap, Velcro loop on the right arm for a 6x7 cm patch, plus two small internal zip pockets.
- **Adjustable Velcro cuffs** and an internal drawcord hem for a secure fit and reduced heat loss.

How to use / When it’s useful

Quick answer: use the parka as a primary outer layer in wet and windy weather, or remove the fleece liner for milder conditions. It works well for patrols, field operations, search and rescue, hiking and other outdoor duty where weather protection and mobility are required.

In most cases, open the armpit zips during strenuous activity to boost airflow and close them when resting or in heavy rain to maintain waterproofing. The removable liner can be worn alone as a light jacket or zipped into the shell for full thermal protection.

Care and notes

Maintain performance by following the garment care label and basic handling steps. Take care with the membrane and sealed seams to preserve waterproofing.

- Follow the care label instructions on the jacket and liner.
- Remove the fleece liner before washing the outer shell.
- Close zips and fasten the storm flap before cleaning to protect hardware and seams.
- Avoid harsh solvents and strong fabric softeners that can reduce water repellency.

FAQ

Q: Is the ECWS Black Parka fully waterproof?

A: Yes. The combination of a water?repellent polyamide shell, Advanta® membrane and hot?taped sealed seams provides full protection from rain under normal outdoor conditions.

Q: Is the fleece liner removable?

A: Yes. The olive micro?fleece liner (100% polyester micro pile) is fully removable and can be used separately as a light jacket or inserted for added insulation.

Q: Can I ventilate the parka during high activity?

A: Yes. The parka has armpit zips designed for ventilation to reduce overheating and moisture build?up during intense physical activity.

Q: Is the parka windproof?

A: The Advanta® membrane and storm flap with press studs provide strong resistance to wind, helping retain warmth and block drafts in exposed conditions.

Q: Can I attach identification patches?

A: Yes. The left arm pocket has a Velcro surface under the flap and the right arm has a Velcro loop sized for a 6x7 cm patch or badge for ID and unit insignia.

Q: How do I choose the correct size?

A: Measure chest, waist and hips as described on the product page size chart. A correct fit ensures optimal protection, mobility and liner compatibility.

Tip: Choose the right size and variant for your activity—try the liner in and out to match conditions. Browse related tactical and military surplus jackets on Tutto Militare to compare features and find the best match for your duty or outdoor needs.
