Product short description:

Anfibi Crispi Leopard Brown combat boots offer comfort and durability for outdoor enthusiasts and professionals who need reliable footwear on rough terrain.

- **Material:** Constructed from high-quality materials for long-lasting wear and improved breathability.
- **Use:** Ideal for long walks and hikes on rough or uneven terrain, as well as everyday urban use.
- **Support:** Designed to provide stable support and comfort for extended activity.
- **Traction:** Robust, slip-resistant outsole enhances stability and safety on varied surfaces.
- **Style:** Elegant brown finish that works for outdoor and casual settings.

Product description:

Product overview

The Crispi Leopard Brown are lightweight summer tactical boots designed for operational use, parachute jumps and general field work by military, police and duty professionals. They suit users

who need a breathable, low-weight boot with reliable grip and protection.

Definition: Crispi Leopard Brown are summer tactical/duty boots built from water?repellent full?grain leather with Cordura inserts, a 3D ventilating lining and a redesigned Vibram outsole for improved traction and comfort.

Main features

Key features that make these boots suitable for warm-weather operations and varied terrain:

- **Full?grain water?repellent leather** upper in brown for durability and basic water resistance.
- **Cordura inserts** to increase ventilation and reduce weight.
- **3D fabric lining** for improved breathability and foot comfort in hot conditions.
- **Redesigned Vibram outsole** with grippy compound for traction on multiple surfaces.
- **PU cushioned midsole** to reduce foot fatigue on long missions.
- **Removable P100 + Cambrelle insole** for hygiene, breathability and easy replacement.
- **Rubberized toe and ankle protection** for added impact resistance during operations.

How to use / When it’s useful

Quick answer: Use these boots for spring, summer and early autumn deployments, field training, duty shifts and jump operations where breathability and reduced weight are priorities. They are made for tactical and military surplus needs where ventilation and grip matter.

In most cases, these boots perform best in warm or temperate climates and on mixed terrain — urban, forest and moderate mountain trails. They are not designed as heavy insulated winter boots, so consider warmer footwear for extreme cold or deep snow.

Care and notes

Basic care will extend the life of the leather and maintain performance; follow these simple steps after use and store them properly.

- Clean with a damp cloth and remove dirt after each use.
- Apply appropriate leather care products rather than harsh chemicals.
- Air dry at room temperature; avoid direct heat sources that can damage leather or lining.
- Use the removable P100 + Cambrelle insole to dry or replace when needed.
- Note: designed primarily for warm-season use — not insulated for cold-weather operations.

FAQ

Q: What sizes are available for Crispi Leopard Brown?

A: Sizes usually range from 38 to 47. Check the seller’s size guide to confirm the best fit before ordering.

Q: Are these boots waterproof?

A: The upper is made of water?repellent full?grain leather, offering good resistance to light moisture and splashes but they are not fully waterproof like sealed Gore?Tex boots.

Q: Can I use these boots in winter?

A: They are designed for spring, summer and autumn use. For prolonged exposure to cold, wet or snowy conditions, choose insulated or fully waterproof winter boots.

Q: How should I clean the Crispi Leopard Brown boots?

A: Wipe off dirt with a damp cloth, allow to air dry, and use leather care products for protection. Do not machine wash or dry with direct heat.

Q: Are the insoles removable?

A: Yes — the boots include a removable P100 + Cambrelle insole for improved breathability and easy washing or replacement.

Q: Are these boots suitable for mountain hikes?

A: Yes, the Vibram outsole and sturdy construction make them suitable for a range of terrains, including moderate mountain trails, but they are optimized for warmer conditions.

Tip: Choose the correct size variant and consider trying them on with the socks you will wear in the field; compare sizes if you are between numbers. Browse related tactical and duty boots to find options for colder or fully waterproof needs.
