Product short description:

Guanti Tattici Raptor Alta Sensibilità are tactical gloves designed for users who need reliable protection and good dexterity for outdoor activities, extreme sports, or demanding work. They pair durable, breathable materials with an ergonomic cut for comfortable, long-lasting wear.

- **Material:** Durable, breathable fabrics for ventilation and wear resistance.
- **Use:** Suitable for outdoor pursuits, extreme sports and heavy-duty tasks.
- **Protection:** Strategic reinforcements provide targeted protection without limiting movement.
- **Fit:** Adjustable closure ensures a secure, customizable fit.
- **Design:** Modern tactical look with a secure grip and high touch sensitivity.

Product description:

Product overview

The Raptor Tactical Gloves are lightweight, high-sensitivity gloves made for users who need dexterity and a secure grip in tactical, military, police, duty or airsoft activities. They combine a lycra body with very light leather on the palm and index to keep touch feedback while providing protection where it matters.

Definition: Raptor Tactical Gloves are lycra gloves with a thin leather-coated palm and index and a thermoperforated rubber reinforcement on the back for improved breathability. They are a practical choice for operators, officers and airsoft players seeking tactile control and comfort. Limited stock may apply.

Main features

Designed for sensitivity, grip and comfort during extended wear.

- **High sensitivity:** Thin leather on the palm and index preserves fine touch for precise movements.
- **Quality materials:** Lycra body for flexibility and lightweight leather for a secure grip.
- **Breathability:** Thermoperforated, treated rubber reinforcement on the back improves airflow to reduce sweat.
- **Secure fit:** Velcro wrist closure for a stable, adjustable fit that keeps the glove in place.
- **Touchscreen compatible:** Designed to work with most touchscreen devices for modern field use.
- **Durable construction:** Built for repeated use in tactical, military, police and airsoft environments.

How to use / When it’s useful

Quick answer: Use these gloves when you need precise finger control and a reliable grip—handling equipment, controls, firearms, or playing airsoft are common uses. They are made to balance sensitivity with light protection rather than heavy insulation.

In most cases, the Raptor gloves perform well during patrols, range sessions, training and recreational tactical games where dexterity matters. They are not intended as thermal gloves for extreme cold or as hard-impact protective gloves.

Care and notes

Simple care keeps the gloves performing longer. Follow these basic instructions and warnings.

- Hand wash with warm water and mild soap; avoid aggressive detergents or bleach.
- Fasten the Velcro before washing to protect the material and closure.
- Air dry away from direct heat; do not tumble dry.
- Not designed for extreme cold, ballistic protection, or heavy cut resistance.

FAQ

Q: What sizes are available for the Raptor Tactical Gloves?

A: The gloves are available in multiple sizes. Check our size guide to select the correct fit for your

hand measurements to ensure optimal sensitivity and comfort.

Q: Can I wash these gloves?

A: Yes. Hand wash with warm water and mild soap, then air dry. Avoid harsh detergents and machine washing to preserve the leather and treated rubber.

Q: Are the gloves compatible with touchscreen devices?

A: Yes. They are designed to work with most touchscreen devices, allowing you to operate phones or tablets without removing the gloves.

Q: How long do the gloves last?

A: Durability depends on use and care. With regular use and proper maintenance, they can last for several seasons, but heavy daily use will reduce lifespan.

Q: Do these gloves protect against the cold?

A: They provide moderate protection against mild cold but are not intended for extreme temperatures. For severe cold weather, use insulated gloves designed for those conditions.

Q: Are Raptor gloves suitable for handling firearms or heavy tools?

A: They offer good tactile feedback and grip for handling firearms, tools and equipment. They are not a substitute for specialized cut-resistant or ballistic protection gear.

Tip: Choose the right size using our size guide and consider related tactical gloves and accessories to complete your kit. Browsing matching items can help you build a consistent, mission-ready setup.
