Product short description:

Thermal Olive Green Fleece Gloves are soft, warm gloves designed for cold weather. Ideal for outdoor activities and everyday use, they offer practical insulation with a natural, understated style.

- **Material:** Soft fleece that feels comfortable against the skin.
- **Insulation:** Provides reliable thermal protection to keep hands warm.
- **Fit:** Ergonomic design for a secure, comfortable fit and good dexterity.
- **Use:** Suitable for outdoor adventures, work, and daily wear.

Product description:

Product overview

The Olive Green Thermal Fleece Gloves are insulated winter gloves designed for everyday wear and outdoor activities, including tactical or duty use. They suit civilian commuters, hikers, and professionals who need reliable hand warmth with a low-profile look.

Definition: Thermal fleece gloves are soft, insulated gloves made from fleece fabric to retain body heat. These gloves combine thermal insulation with an elasticated wrist for a secure fit and lightweight comfort.

Main features

Practical, low-bulk gloves that balance warmth and mobility—also suitable for tactical, military surplus, and police use where a discreet olive green color is preferred.

- **High-quality thermal fleece:** Soft insulating fabric to help retain heat in cold conditions.
- **Elasticated wrist:** Snug cuff to reduce heat loss and keep out drafts.
- **Olive green color:** Versatile, low-visibility shade that works for casual and duty wear.
- **Lightweight comfort:** Designed for extended wear without bulk.
- **Easy care:** Machine washable on a gentle cycle; avoids complex maintenance.
- **Multiple sizes available:** Offered in a range of sizes for a better fit.

How to use / When it’s useful

Quick answer: Wear these gloves for daily cold-weather use—commuting, walking, or light outdoor work. They are intended as an insulating layer rather than heavy-duty waterproof gloves.

In most cases, they work well on their own for mild to moderate cold, or as a mid-layer under tougher outer gloves for more severe conditions. Use them for hiking, winter sports, patrols, or general duty tasks where dexterity and warmth are both needed.

Care and notes

Simple care keeps the fleece performing and preserves the color.

- Wash by hand or machine on a gentle cycle with mild detergent.
- Avoid fabric softeners to maintain insulation and fabric performance.
- Air dry flat; avoid high heat from dryers to prevent fabric damage.
- Color is designed to resist fading with normal care and washing.

FAQ

Q: What sizes are available for these gloves?

A: The gloves are offered in multiple sizes to fit different hands. Check the store size guide to pick the best fit for your measurements.

Q: How should I wash the gloves?

A: Wash by hand or in a washing machine on a gentle cycle with mild detergent. Do not use

fabric softener and allow them to air dry.

Q: Are these gloves suitable for outdoor activities?

A: Yes. They provide good thermal insulation for hiking, walking, and general outdoor work in cold conditions. They are not intended as a waterproof outer shell.

Q: Will the olive green color fade over time?

A: The fabric is designed to be colorfast under normal use and washing, but following the care instructions will help preserve the color longer.

Q: Can I use these gloves for daily duty or police work?

A: These gloves are suitable for light duty and tactical-style use where warmth and low visibility are needed. For specialized protective requirements, choose equipment designed for that task.

Q: Are these gloves bulky under other layers?

A: No. They are lightweight and low-bulk, so they can be worn alone or as a mid-layer under heavier gloves or shells when additional protection is required.

Tip: Choose the right size for a snug fit and consider whether you need a mid-layer or an outer waterproof glove for extreme conditions. Browse related tactical and cold-weather gear to complete your setup.
