Product short description:

A compact tactical pen for personal defense and everyday carry. Ideal for civilians, security personnel and outdoor users who want a discreet, practical tool.

- **Material:** Robust construction for reliable everyday use.
- **Use:** Designed as a dual-purpose writing instrument and self-defense aid.
- **Design:** Low-profile, discreet shape for easy pocket carry and minimal visibility.
- **Carry:** Compatible with pockets, pouches or a dedicated holster for quick access.
- **Note:** Check local laws and use responsibly.

Product description:

Product overview

The Tactical Personal Defense Pen is a dual-purpose everyday carry (EDC) tool for civilians, security personnel, and police officers who want a discreet self-defense option that also functions as a quality pen. Definition: a tactical pen is a writing instrument built for normal use that includes reinforced features for personal safety and emergency situations.

This pen combines a slim, elegant design with practical defensive features: anodized black aluminum construction, a smooth black ink refill, a diamond-tip glass breaker, and a secure pocket clip. It suits tactical, military surplus-style gear collections and duty-ready everyday carry kits.

Main features

Solid, lightweight construction with simple, reliable functions for writing and emergency use.

- **Anodized black aluminum body:** durable and lightweight (aircraft-grade aluminum as stated).
- **Black ink refillable ballpoint:** smooth writing and standard refill compatibility.
- **Diamond-tip glass breaker:** integrated at the top for emergency glass-breaking.
- **Slim dimensions:** 15.5 cm length, 1 cm diameter — comfortable for pocket carry.
- **Secure clip:** black clip with a slot for easy jacket or pocket attachment.
- **Lightweight:** approx. 49 grams for everyday carry.

How to use / When it’s useful

Use the pen as your everyday writing instrument; twist the rear section to extend or retract the ballpoint. The diamond tip at the other end is for emergency use only, such as breaking glass in a vehicle or building exit scenario.

Quick answer: carry it like a normal pen and use the clip to secure it in your pocket. In most cases, this pen serves as a discreet self-defense option and an emergency tool while remaining a fully functional pen for daily tasks.

Care and notes

Basic care keeps the pen reliable: avoid full submersion, change refills as needed, and store safely away from children. Follow these simple notes for long-term use.

- Refill with standard black ballpoint cartridges when ink runs low.
- Resistant to splashes but not fully waterproof; avoid immersion.
- The diamond tip is designed for emergency glass breaking and should be used carefully; it is not intended to damage clothing.
- Check local laws and airline rules before carrying on flights or in restricted areas.

FAQ

Q: Is the pen refillable?

A: Yes. The pen accepts common black ballpoint refills. Replace cartridges when ink flow declines to maintain smooth writing.

Q: Can the diamond tip damage clothing?

A: The tip is designed for emergency use and not to damage fabrics under normal carry. Use caution to avoid accidental contact with soft materials.

Q: Is it legal to bring this pen on an airplane?

A: Generally it may be carried in checked or carry-on baggage, but regulations vary. We recommend checking the airline and local security rules before travel.

Q: Is the pen waterproof?

A: The pen is splash-resistant and suitable for everyday conditions, but it is not fully waterproof. Do not submerge the pen in water.

Q: How long does the ink last?

A: Ink duration depends on usage. Under normal daily use, a single refill typically lasts several months; high-frequency use will reduce that time.

Q: What are the pen’s dimensions and weight?

A: The pen measures 15.5 cm in length, 1 cm in diameter, and weighs about 49 grams — compact and lightweight for EDC or duty carry.

Tip: Choose the right variant or finish for your everyday carry needs and browse related tactical and military surplus accessories to build a complete EDC or duty kit.
